abide by the contract", conforms to the market requirement, joins in the market competition by its high quality as well as provides more and excellent service for clients to let them become big winner. The pursue of the company, is the clients' satisfaction for [24v Dc In Wheel Inch Dc Motor Wheel](#), [48v Dc Stepping Motor](#), While using the improvement of society and economy, our corporation will retain a tenet o high quality the first", moreover, we count on to make a glorious long run with each and every customer.

Factory directly 36v Amr Brushless Hub Motor - ZLTECH 6.5inch 24-48VDC 350W Wheel hub motor for robot – ZhongLing Detail:

Features

1. The hub motor is an integrated servo hub motor structure that directly integrates the hub and the driving device, high response and high positioning accuracy of the servo motor, does not need a gearbox, and is convenient and easy to install.
2. The integrated structure of encoder, motor and wheel is more conducive to improving accuracy and reliability.
3. The installation mode is simple, the installation is convenient and the precision is high.
4. Outstanding low-speed characteristics and good stability.
5. Low noise, compared with the traditional scheme of brush or brushless motor+reducer, the mute effect is good.
6. Built-in encoder, simple wiring, strong earthquake resistance.
7. Built-in temperature sensor can monitor the motor temperature in real time, providing various protection mechanisms.
